The Private Sector in Morocco is Preparing the Implementation of the Paris Agreement

MOROCCAN BUSINESS CLIMATE INITIATIVE MBCI
Mitigation

Reducing 42% of GHG emissions by 2030:

- the unconditional NDC based on the mobilization of its own resources: A 17% reduction in greenhouse gas emissions (GHG) by 2030 compared to emissions projected in the same year according to the BAU ($26 billion)
- the conditional NDC considering international support needs. An additional 25% reduction achievable under certain conditions. ($24 billion)
The Paris Agreement:
A Strong Engagement for Morocco

Adaptation

- Morocco proposes in its NDC various adaptation’s strategic programs in vulnerable key sectors: Water, Agriculture, Forests, Fisheries, and Aquaculture.

- Morocco's estimated needs for the implementation of the adaptation programs in water, forestry, and agriculture sectors, which are the most vulnerable sectors in CC, are to be minimum 35 billion dollars.

The private sector must be able to support the Government of Morocco in the fulfillment of its commitment.

In this dynamic, the private sector will be initiated into the new low carbon and CC resilient economy.

MBCI
Integrating climate risks and opportunities in the development plans of Moroccan companies

Supporting the commitment of businesses to climate issues by subscribing to a Climate charter and, in the medium term, by awarding a Climate Label

Proposing technical, technological and financial solutions that are tangible and implementable by companies for both mitigation and adaptation

Supporting the development of a green economy at the national level with an expected reach at the African level

MOROCCAN BUSINESS CLIMATE INITIATIVE

A PRAGMATIC VISION THAT MEETS THE CHALLENGES OF THE PRIVATE SECTOR

4 Goals
MOROCCAN BUSINESS CLIMATE INITIATIVE (MBCI)

CAPACITY BUILDING

Sensitization  Support  Training  Development

CLIMATE ENTERPRISE ACTIONS

sector  Territory  PP Synergies  International Synergies

MBCI PRIMING 2017-2018

MBCI DEVELOPMENT 2019 +
AWARENESS-RAISING
An awareness and information program for effective awareness about the risks and opportunities offered by Climate Change (CC)

- Informing and educating companies in a clear and simple way on the issue of Climate Change, its challenges, risks and opportunities;
- Organization of events and establishment of tools: seminars, roundtables, monthly newsletter, guides, movies.

TRAINING
Appropriate training

- Thematic training on different technical, institutional, legislative and financial aspects of Climate Change;
- Training catalogues to be designed with the support of the Moroccan Centre for Cleaner Production (CMPP) and other centers.

SUPPORT
An on-site support provided to companies engaged in a Climate Change approach

- Technical support provided to companies by the CMPP for:
  - The implementation of the GHG balance, energy audit and mitigation plan;
  - Characterization of vulnerability and proposal for adaptation plan;
  - Support for the setting up of climate projects and for funding according to donors’ criteria.

DEVELOPMENT

- Launching studies and research on Climate risks and opportunities per sector, company type and region;
- Taking part in climate negotiations and establishing permanent contacts with the government and employers’ associations;
- Establishing a climate, technological and Climate Change regulatory watch system;
- Promoting and supporting the use of new approaches to climate and climate financing;
- Creating a framework allowing the most committed companies to enhance their efforts => Moroccan Business Climate Charter.
FRAMEWORK FOR THE INITIATIVE’S IMPLEMENTATION

**Climate Task Force**

**Missions**
- Adoption of MBCI and its annual implementation plans;
- Mobilization of resources for the implementation of MBCI;
- Evaluation and updating of the MBCI.

**Climate Technical Committee**

**Missions**
- Framing the implementation of the MBCI

**Climate Focal Points**

**Missions**
- Promoting the integration of risks / cc opportunities in a sector or a region;
- Extracting the challenges and the climate change needs of the regions and federations;
- Promoting the participation of the region and federation in the implementation of the MBCI programs.

**Mission:**
- The implementation of the MBCI action plan
ACTION PLAN 2017-2018

« SENSITIZATION » AXIS

The Moroccan Business Climate Initiative, By its goals & missions, is able to assist the Moroccan private sector in this preparation through:

• The edition of a monthly e-newsletter: Echos ECM
• The creation of an ECM website: www.cmpp.org.ma
• The Preparation and dissemination of an ECM guide
• The regular organization by the CGEM of « Evening debates on Business and Climate Change" around 14 different topics
• The organization of an annual ECM Forum, 6 July 2017
# TOPICS OF THE EVENING DEBATES 2017-2018
